They find it laborious - even painful - to put their scholarly work into words. They get bogged down in the study, and lose track of the story. And they produce uninspiring papers that fail to resonate with readers or reviewers. This book offers an antidote to this problem: brief, accessible lessons that guide researchers to write clear and compelling scientific manuscripts. The book is divided into three sections - Story, Craft, and Community. The Story section offers advice on getting the balance of study and story just right, introducing strategies for tackling each section of a scientific manuscript. The Craft section considers the grammatical and rhetorical tools of the trade, showing how they can be wielded for maximum impact. And the Community section offers suggestions for writing collaboratively, supporting other writers, and navigating peer review. Each section features multiple short and pragmatic lessons, peppered with illustrative examples. Readers can use the chapters collectively to build holistic writing skills, or dip in and out to refine specific elements of the craft. Rooted in a coaching philosophy, we aim to unlock our readers' potential as writers through instruction, reflection, and example. And we hope to inspire researchers to face writing with joy. This work is clearly written and easily understandable. Its many practical examples, tools, and exercises make an effective toolbox of support for scholarly writers. This will be invaluable to new scholars and help established scholars as well. The inclusion of examples specific to the health arena and the clear, elegantly simple explanations add strength and relevance to this work. Toni Ungaretti, Johns Hopkins School of Education, Baltimore, MD, USA This book is the most original perspective I have ever read about the craft of writing. As its title suggests, it is inspiring. Brownie Anderson, NBME, Philadelphia, PA, USA Ideal for overseas students studying at English-medium colleges and universities, this practical writing course enables international students to meet the required standard of writing and use an appropriate style for essays, exams and dissertations. Newly revised and updated to include extra exercises and material suggested by teachers and students, Academic Writing explains and demonstrates all the key writing skills and is ideal for use in the classroom or for independent study. Useful at every stage of an academic career and beyond, this indispensable book features: different styles and formats from CVs and letters to formal essays; focus on accuracy coverage of all stages of writing, from understanding titles to checking your work essential academic writing skills such as proper referencing, summarising and paraphrasing diagrams and practice exercises, complete with answers. English for Academic Study: Grammar for Writing English for Academic Study: Grammar for Writing is a graded self-study course that will help students improve their academic writing. It will build their confidence in understanding and using grammar for written assignments, so they can write accurate English and communicate more effectively in academic contexts. EAS: Grammar for Writing starts at a relatively low level, recognizing that many students require continuing practice of common grammatical problems in academic writing (such as subject-verb agreement, or the use of present simple and present continuous). It gradually increases the level of challenge so that by the end of the book students can use appropriate grammatical structures to express more complex academic ideas. The nine units are based on the following topics: Starting out Information flow within a text Looking back (past simple and present perfect) Showing logical links (1) Showing logical links (2) Expressing shades of meaning Expressing condition Avoiding person-based writing Using relative clauses Each unit is divided into three stages, moving from basic structures to more complex ones. Full explanations and examples are followed by extensive practice exercises. Many exercises use examples from student essays, so students can identify typical problems and work out how to put them right. Each unit also includes an end-of-unit self-check test to give students a quick overview of what they have covered. There are four useful appendices on: articles, describing data, referring to academic sources, and a sample student essay. A full answer key is available here. The dedicated EAS website also provides additional resources across the range of titles in the series. This book can be used in conjunction with the following books in the English for Academic Studies (EAS) series, also published by Garnet Education: EAS: Reading, EAS: Writing, EAS: Extended Writing & Research Skills, EAS: Listening, EAS: Speaking, EAS: Vocabulary and EAS: Pronunciation Designed as an individualized workshop to assist case authors to structure their writing, this book combines the easy-to-understand, student-focused language with new material covering the latest developments and challenges in the world of case writing. Is a literature review looming in your future? Are you procrastinating on writing a literature review at this very moment? If so, this is the book for you. Writing often causes trepidation and procrastination for engineering students—issues that compound while writing a literature review, a type of academic writing most engineers have never formally taught. Consider this workbook as a "couch-to-5k" program for engineering writers rather than runners: if you complete the activities in this book from beginning to end, you will have a literature review draft ready for revision and content editing by your research advisor. So, You Have to Write a Literature Review presents a dynamic and practical method in which engineering students—typically late-career undergraduates or graduate students—can learn to write literature reviews, and translate genre-based writing instruction into easy-to-follow, bite-sized activities and content. Written in a refreshingly conversational style while acknowledging that writing is quite difficult, Catherine Berdanier and Joshua Lenart leverage their unique disciplinary backgrounds with decades of experience teaching academic engineering writing in this user-friendly workbook.
