At last, GPs and practice managers have a clear reference on all matters relating to practice finance. Now the need could not be greater - as primary care continues to evolve, more staff are employed and new services are offered.

Sound financial management is essential if pitfalls are to be avoided. Written by specialists in the increasingly complex area of practice finance, this book provides a readily-accessible guide for non-specialists, providing answers to routine queries and illustrating typical situations with worked examples. From the completely juvenile yet brilliant mind of Sidharth Sharotri comes a compilation of his 'serious automobile journalism' work, which consisted of him driving posh cars and making up stories around them for newspapers. These highly technical (read: not at all technical) articles first appeared in a weekly motoring page called Honk in Deccan Chronicle and Asian Age between 2013 and 2015, which this author was exclusively entrusted with. Letters from the Open Road does exactly what his newspaper articles did – make the reader giggle a little bit while making them wonder if they should chase their own childhood dreams. 15 drives and detours in “The Land of Enchantment” In this brand-new first edition guide, Sharon Niederman presents the best of New Mexico through 15 scenic tours designed to make the most of every mile. Readers will journey across the state and take in New Mexico’s unparalleled diversity in both natural beauty and cultural heritage. Drives will include peaceful side roads through quiet towns, highways with stunning canyon vistas, the streets of Spanish missions and stone cities, sweeping views of New Mexico’s famous mesas, and much more. Included with each drive are recommendations for food, shopping, sightseeing, and lodging, as well as detailed directions and fascinating local history from a veteran Southwestern travel writer. Expert navigation, curation, and beautiful photography will have readers eager to explore New Mexico in a whole new light. Offers advice for prospective buyers of cars and trucks, reveals information on secret warranties and confidential service bulletins, and tells how to complain and get results. V10 VIXEN does not just give her funny yet amazing descriptions on Supercars but cars - that are closer to her heart , Classic Cars and practical cars. This first book as she is writing many more! Brings all her different Motoring Tastes together and gives WOMAN PETROL HEADS VIEW ON MOTORING - which is new because most books are written by men. Debunks the great tourist myth, and explains how the Santa Fe architectural and design style, so popular with millions of visitors today, was consciously created by Anglos in the early 20th century. This colorful 43 page booklet includes 30 plant-based southwestern recipes (24 are gluten-free). Each recipe includes one or more photo and a nutritional analysis. Emphasis is put on some of New Mexico's delicious ingredients such as Hatch green chile peppers, dried Chimayo red chile powder, and Valencia peanuts from Portales; ingredient substitution recommendations are included as well. A list of online suppliers of ingredients is included as well. A sample of the vegan recipes include: Pico de Gallo, Ancho Chile Nuts, Salsa Verde, Skillet Blue Cornbread, Red Chile Vinaigrette, Calabacitas, Crockpot Posole with Red Chile, Sopa de Fideos, Chile Rellenos with Chimayo Tomato Sauce, Green Chile Enchiladas with Chard and Pinto Beans, Pan Fried Chimichangas with Creamy Avocado Sauce, and Capirotada. Nanette Blanchard is a freelance food writer and the author of 'Tis the Season: A Vegetarian Christmas Cookbook (Simon & Schuster). Amazing Festivals presents more than 200 of North America's longest running, most popular, and quirkiest festivals. All 50 states in the United States are represented. The Committee reports on the progress made by the Treasury in placing environmental objectives at the heart of its fiscal policies. This year's pre-Budget report (Cm. 6701, December 2005, ISBN 0101670125) is found to be inadequate, especially in the context of UK CO2 emissions actually increasing once more. No significant new measures were announced, and the Committee sees a continued slowing down of the Treasury's momentum in turning rhetoric into action. It believes the Treasury should redefine Air Passenger Duty (APD) as an environmental tax and that APD rates should more accurately reflect the carbon emissions of the flights to which they apply. Charging APD on flights rather than passengers could also act as an incentive to more efficient use of aviation fuel. The Committee also recommends action on aviation fuel duty, biofuels, car energy efficiency, steps to wean the economy off over-reliance on oil, stamp duty and council tax reductions for homes built or refurbished to high environmental standards. Each pre-Budget report should include figures on total revenue from the climate change levy, aggregates levy, and landfill tax. Although the Treasury accepts the principle of increasing taxes on "bads" rather than "goods" its reluctance for bold reform of the tax system mystifies the Committee. A Green tax Commission should be reconsidered, to develop a proper communications strategy to sell the environmental programme to the public. The Committee exhorts the Government to make moves on the climate change problem, as waiting for universal agreement is a recipe for stasis. Finally, the Committee regrets the Treasury's decision to abolish the Operating and Financial Review required from large companies, in that it appears to view sustainable reporting as an optional extra. It hopes that the proposed new business reviews will continue to require some form of social and environmental disclosure from companies. lifestyle. If being a grown-up were as simple as holding down a job, buying a reliable car, finding the home of your dreams and living happily ever after, there'd be no need for this true story. But our mid-thirties author's unorthodox approach and complete failure to accept the world as defined by adults was never going to make it quite so straightforward - especially when Brexit threw a spanner in the works. "If you liked the works of Bill Bryson, Pete McCarthy or Tony Hawks, you will enjoy this." - Amazon Review by Ian S Set against the backdrop of his ever-swelling grumpiness and the growing realization that he might never actually become a millionaire, this book follows him and his trusty hatchback as they travel by road from England to Vienna, seizing the chance to live in Europe before it closed to Brits forever. It's a journey that takes him to Cyprus and Venice, Slovenia and Surrey, Belgium and Bonn. "A hybrid of Victor Meldrew and Tony Hancock, with attitude!" - Direct Reader Comment

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

A obra tem como foco principal estabelecer a gestão de marcas como um dos componentes fundamentais do processo mercadológico, no sentido de agregar e criar valor e estabelecer diferenciais competitivos para a empresa. Para isso, os autores tratam, além da gestão da marca e sua relação com as estratégias mercadológicas, a sua importância dentro de um contexto em profundas transformações. Partindo do pressuposto de que as marcas, se bem geridas, influenciam o comportamento do consumidor em seu processo de compra, os autores estabelecem os pontos de relação entre marcas e as demais estratégias mercadológicas da empresa. A importância para a área de Marketing, Administração e Comunicação Social deve-se ao fato de possuir uma visão tático-estratégica do processo de criação e gestão desse importante componente mercadológico. Entre outros temas, a obra aborda a história das marcas no mundo, as marcas no contexto mercadológico, a experiência de consumo (branding sensorial para o fortalecimento da marca), processo de criação e desenvolvimento, a estrutura das marcas, suas extensões e brand equity.

While there is substantial research surrounding manufacturing and design-related product hazards, little has been written about supply chain product hazards and how they impact supply chain quality management. Filling this need, *Global Supply Chain Quality Management: Product Recalls and Their Impact* draws together key insights and research findings from a global research project on product safety and recalls. The book presents detailed case studies of six extended global supply chains within three industries: toys, food, and pharmaceuticals. These case studies cover U.S. companies with supply chains that extend into China and provide the perspectives of both U.S. and Chinese executives. It includes coverage of several highly publicized product recalls, including Ford Pinto, Extra Strength Tylenol, melamine-tainted milk, Mattel, and Toyota. Presenting detailed examples of both poor and best practices, the text supplies firsthand accounts from key players in well-known product recalls. It outlines an event study methodology that can help readers determine the true financial impact of a product recall announcement. It also describes how to conduct controlled experiments to determine the effect of various recall strategies on consumers. The book describes how alternative product recall strategies can influence consumers' perception of your organization's corporate social legitimacy as well as their future purchasing behaviors. Although the text focuses on product quality within the supply chain, it also sheds light on other sources of product hazards—sharing a wide-ranging perspectives and current methodologies. This book presents a concise framework for assessing technical and sustainability impacts of existing biorefineries and provides a possible road map for development of novel biorefineries. It offers a detailed, integrated approach to evaluate the entire biomass production chain, from the agricultural feedstock production and transportation, to the industrial conversion and commercialization & use of products. The Brazilian sugarcane biorefinery is used as a case study; however, the methods and concepts can be applied to almost any biomass alternative. Chapters explore the main issues regarding biorefinery assessment, including feedstock production and transportation modeling, biofuels and green chemistry products, as well as assessment of sustainability impacts. This book is a valuable source of information to researchers in bioenergy, green chemistry and sustainability fields. It also provides a useful framework for government agencies, investors and the energy industry to evaluate and predict the success of current and future biorefinery alternatives. As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, *Lemon-Aid* guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-

truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There's only one Saturn you should buy. Toyota – enough apologies: "when you mess up, 'fess up." Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Make your next vacation a pilgrimage... Signs & Shrines: Spiritual Journeys Across New Mexico takes readers along the ancient pilgrimage trails that crisscross this enchanted state, a place where a rich multiplicity of cultures continue to thrive. From the winding High Road between Santa Fe and Taos to Warriors' Spirit Way across the Black Range; through ghost towns and on to Silver City; to the Old Spanish Trail that originates in Abiquiu, you'll find the pathways that spiritual seekers have followed for centuries. The mysteries of sacred sites, natural wonders, power spots, feast days, and festivals are here explained by one of the state's most prolific and knowledgeable authors. In addition to providing cultural context that answers visitors' questions about history and practices found only in New Mexico, the author provides clear directions, maps, and guidance on the best places to stay, dine, shop, and recreate on your route. Signs & Shrines is an innovative guide that will enrich the experience not only of spiritual seekers but of every visitor drawn to tour the Land of Enchantment. In today's wireless environment, marketing is more frequently occurring at the server-to-device level—with that device being anything from a laptop or phone to a TV or car. In this real-time digital marketplace, human attributes such as income, marital status, and age are not the most reliable attributes for modeling consumer behaviors. A more effective approach is to monitor and model the consumer's device activities and behavioral patterns. Machine-to-Machine Marketing (M3) via Anonymous Advertising Apps Anywhere Anytime (A5) examines the technologies, software, networks, mechanisms, techniques, and solution providers that are shaping the next generation of mobile advertising. Discussing the interactive environments that comprise the web, it explains how to deploy Machine-to-Machine Marketing (M3) and Anonymous Advertising Apps Anywhere Anytime (A5). The book is organized into four sections: Why – Discusses the interactive environments and explains how M3 can be deployed How – Describes which technologies and solution providers can be used for executing M3 Checklists – Contains lists of techniques, strategies, technologies, and solution providers for M3 Case Studies – Illustrates M3 and A5 implementations in companies across various industries Providing wide-ranging coverage that touches on data mining, the web, social media, marketing, and mobile communications, the book's case studies show how M3 and A5 are being implemented at JP Morgan Chase, Hyundai, Dunkin' Donuts, New York Life, Twitter, Best Buy, JetBlue, IKEA, Urban Outfitters, JC Penney, Sony, eHarmony, and NASCAR just to name a few. These case studies provide you with the real-world insight needed to market effectively and profitably well into the future. Each company, network, and resource mentioned in the book can be accessed through the hundreds of links included on the book's companion site: www.jesumen.com Twenty-nine collected essays represent a critical history of Shakespeare's play as text and as theater, beginning with Samuel Johnson in 1765, and ending with a review of the Royal Shakespeare Company production in 1991. The criticism centers on three aspects of the play: the love/friendship debate.
