Why Your Business Needs a Website If you're doing business today - online OR offline - you need a website. It's that simple. Every day, Google completes more than 5 billion searches. Think some of those people, even just a tiny fraction, might be searching for what you sell? If you don't have a website, how will they ever find you? This book is about setting up your web presence the right way, or optimizing your existing website to reach more visitors. Ultimately it's about generating more traffic, more leads, and more sales and profit for your small business. Who is This Book For? This book is for small business owners who: -Have a website, but feel like it's not delivering the results it could. -Need a website, but aren't sure where to start or who to trust for advice. - Are confused and intimidated when dealing with technical problems or contracting with programmers. Have you been overpromised or oversold by web developers in the past? You're not alone. In fact, it happened to me. It seems like there's an entire industry out there trying to milk small business owners out of their hard-earned cash. But you don't need to be another victim. Armed with this checklist, you'll have a working knowledge of all the important elements of a truly awesome website; one that presents your brand to the world and helps achieve your goals online. After all, isn't that what it's all about? Why This List? There is no shortage of resources when it comes to getting started online. Some of these are genuinely helpful, and many of those will be mentioned in the pages ahead. But others just want to sell you some service you don't really need, or get you to sign up for a hosting package through their affiliate link so they can earn a commission. Do they really have your best interest in mind? Many only give you part of the story, or leave you with more questions than answers. What's missing is a comprehensive checklist for small businesses to use when evaluating their current website or when planning out their new site. That's where this book comes in. I'm a small business owner myself, and have been working online for nearly 10 years. In that time, I've come across too many amazing businesses with amazingly bad websites. Or worse, local businesses I wanted to find information on and patronize but that had no website at all. In this book, you will learn how being online can drastically change your business marketing plus, a guide on how to create your website. This is a book for people in the academic or business aspects of the medical industry, medical professionals doing research or looking for a job, medical students, patients and anyone else interested in the United States and Canada infrastructure of medical organization and hospital websites. I focused on American, Canadian and some UK medical organizations and hospitals in this book which made it good-sized already without dipping into my world medical book which offers medical resources for most countries. I created an American medical job book and a general American medical book which were both quite long so I took information about medical organizations and hospitals out of them and created a separate book. As far as information about American-Canadian medical organization and hospital websites go, there is no book or database anywhere that comes close to this one. It's for the medical professional who wants this information at their fingertips all in one place. I got a bunch of medical organization and hospital websites from a website called thegapecenter.com then it disappeared. A German outfit has taken the name over. The original website probably exists at archive.org. Dmoz.org was a human-filtered search site with good lists. It disappeared but is archived at dmoz-odp.org. It had a lot of good information on it. Beyond that, I put the lists of medical organizations and hospitals that I found all over the place in this book. I'm not repeating information in this book that is already in my other books. Find job websites and organizations for most medical careers at my book called: A Medical-Dental-Pharmacy Job-School-Organization Guide
