James Baldwin Now Jun 26 2020 View the Table of Contents Read the Introduction. This excellent volume conceives of Baldwin as a figure crucial to discussions of whiteness, sexuality, and globalization. The times are ripe for the valuable reconsideration of Baldwin that James Baldwin Now provides.-- Jennifer DeVere Brody, George Washington University One of the most prolific and influential African American writers, James Baldwin was for many a harbinger of hope, a man who traversed the genres of art-writing novels, essays, and poetry. James Baldwin Now takes advantage of the latest interdisciplinary work to understand the complexity of Baldwin's vision and contributions without needing to name him as exclusively gay, expatriate, black, or activist. It was, in fact, Baldwin who said, it is quite impossible to write a worthwhile novel about a Jew or a Gentile or a Homosexual, for people refuse... to function in so neat and one-dimensional a fashion. McBride has gathered a unique group of new scholars to interrogate Baldwin's life, his presence, and his political thought and work. James Baldwin Now finally addresses the man who spoke, and continues to speak, so eloquently to crucial issues of the twentieth century. Crap CVs Jul 20 2022 Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

Women Activating Agency in Academia Apr 17 2022 Women Activating Agency in Academia seeks to create and expand safe spaces for scholarly, professional and personal stories and assemblages of agency. It provides readers with the opportunity to connect with the strategies women are using to navigate academe and the core values, linked to trust, relationship, wellbeing and ethics of care, they live by. The collection offers the stories of women academics from around the globe and across disciplines and showcases their efforts to meaningfully listen and converse in order to resist self-audit and diminished identities. Reflections come from a range of responsive, personal and aesthetic techniques, including writing groups, guided autobiography, auto-ethnography, collective activism and slow scholarship. Chapters engage with themes and ideas such as agency, neoliberalism, ontological security, androcentricity, identity and collegial support, which manifest in unique ways for female academics. The focus in this volume is what really matters to women in the academy, as they share their efforts to 'be' themselves in their work, to 'care for themselves and others' and to 'count what isn't counted'. It aims to prove how collaborative storytelling and discussion can empower female academics to preserve and achieve these ambitions.

The Biology of Stentor Oct 31 2020 The Biology of Stentor summarizes all that has been learned about the biology of a certain group of ciliate protozoa: the stentors. Topics covered range from form and function in Stentor to behavior, fine structure, growth and division, and reorganization. Regeneration is also discussed, along with polarity, metabolism, genetics, and primordium development. This volume is comprised of 20 chapters and begins with a characterization of Stentor, with emphasis on its particular advantages in addressing general problems of biology. The reader is then introduced to form and function in Stentor, particularly *S. coeruleus*. The following chapters focus on the behavior (food selection, swimming, response to light, etc.) of stentors and the fine points of structure in terms of which this behavior is to be explained and which demonstrate the highly complex and precise achievements of morphogenesis. The remaining chapters explore growth and division in Stentor as well as the course of reorganization and regeneration; development of the oral primordium and how it is activated and inhibited; rate of regeneration in relation to the polar axis; fusion masses of whole stentors; and reconstitution in disarranged stentors. Various species of Stentor are also described, together with the techniques used to study them. The final chapter deals with hypotheses concerning the morphogenesis of ciliates. This book will be of interest to students and practitioners of biology and physiology.

DISKO (Second Edition) Jan 26 2023 The second edition of DISKO, a photography book about Lithuanian village discos by Andrew Miksys. "The discos of Lithuania were once Soviet offices, detention centers, weapons storage, rare Lithuanian mushroom-packing plants... who knows? ...Andrew's photographs

capture a generation born to bewilderment: the disko kids still carry the past in their eyes and hard-to-maintain indifference, but they are the creatures of a very brief moment in time, one that will never ever exist again except in these pictures. Miksys has caught a fleeting world that emanates death and hope in the pulses of ephemeral disco lights." - Andrei Codrescu For ten years Andrew Miksys traveled the back roads of Lithuania photographing teenagers in village discos (2000-2010). Most of these discos are located in Soviet-era culture houses where Miksys would sometimes find discarded Lenin paintings, old Soviet movie posters, gas masks, and other remnants of the Soviet Union. He became fascinated by all this debris of a dead empire and the teenagers who visited the clubs. It seemed like a perfect backdrop to make a series of photographs about young people in Lithuania, a crumbling past, and the uncertain future of a new generation all together in one room.

Baseball Haiku: The Best Haiku Ever Written about the Game May 26 2020 Presenting more than two hundred of the greatest haiku ever written about the game. There are moments in every baseball game that make fans catch their breath: the pause while a pitcher looks in for the sign, the moment a cocksure rookie gets picked off first, or the instant a batter lashes a game-winning homer into the night sky, just before the sell-out crowd explodes onto its feet. Haiku captures these moments like no other poetic form, and Baseball Haiku captures the sights, the sounds, the smells, and the emotions of the game like no previous

collection. Some of the most important haiku poets of both America and Japan are featured in this anthology; including Jack Kerouac, a longtime baseball fan who pioneered English-language haiku; Alan Pizzarelli, one of the top American haiku and senryu poets of the last thirty years; and Masaoka Shiki, one of the four great pillars of Japanese haiku—a towering figure—who was instrumental in popularizing baseball in Japan during the 1890s. With over two hundred poems spanning more than a century of ball playing, Baseball Haiku reveals the intricate ways in which this enduring and indelible sport—which is played on a field, under an open sky—has always been linked to nature and the seasons. And just as a haiku happens in a timeless now, so too does Baseball Haiku evoke those unforgettable images that capture the actions and atmospheres of the national pastime: each poem resonates like the lonely sound of cleats echoing in the tunnel as a grizzled veteran leaves his final game. The largest collection of haiku and senryu on baseball ever assembled, Baseball Haiku is an extraordinary treasure for any true baseball fan.

A View from Two Benches Sep 10 2021 Whether in football or in the law, Illinois Supreme Court Justice Robert Thomas has always had the "best view from the bench." Bob Thomas got his start in football at the University of Notre Dame, kicking for the famed "Fighting Irish" in the early 1970s. Claimed off waivers by the Chicago Bears in 1975, Thomas helped to take the franchise from their darkest days to their brightest. Yet, on the cusp of the team's greatest moment, he was struck with a shocking blow that challenged his fortitude. In this dramatic retelling of Bob Thomas's fascinating life, renowned sports writer Doug Feldmann shows how neither football nor the law was part of Thomas's dreams while growing up the son of Italian immigrants in Rochester, New York, in the 1960s. Chasing excellence on both the gridiron and in the courtroom, however, would require resilience in ways he could not have imagined. As A View from Two Benches shows us, Bob Thomas reached the top of two separate and distinct professions, guided by a bedrock of faith that has impacted his decisions and actions as both a football player and a judge, helping him navigate the peaks and valleys of life. As Doug Feldmann reveals, Bob Thomas has always stayed true to the values he learned in his earliest days. Doug Feldmann's rich biography of an accomplished kicker and a proud justice of the law shows us that determination and resilience go a long way to a successful and impactful life.

Solar Water Pumping May 18 2022 Pumping water is a universal need and a major energy challenge, especially where electrical service is absent, expensive or unreliable. Water demands are greatest when the sun shines most intensely. Could there be a better power source for pumping, than the sunshine itself? Over a million solar pumps are already in use for irrigation, livestock, pond and stream management, water treatment, homes and communities, emergency relief, government and recreational facilities, and more. They are rapidly replacing hand pumps, engines, windmills, and even public grid power. To succeed, designers, suppliers, funders and owners need to understand the unique aspects of this technology. This comprehensive and unique volume fills a major gap in the literature on this rapidly-growing industry. Three pioneering authors share over 80 years of combined solar pumping experience in private, public and educational sectors.
