Automated Machine Learning Jun 19 2022 This open access book presents the first comprehensive overview of general methods in Automated Machine Learning (AutoML), collects descriptions of existing systems based on these methods, and discusses the first series of international challenges of AutoML systems. The recent success of commercial ML applications and the rapid growth of the field has created a high demand for off-the-shelf ML methods that can be used easily and without expert knowledge. However, many of the recent machine learning successes crucially rely on human experts, who manually select appropriate ML architectures (deep learning architectures or more traditional ML workflows) and their hyperparameters. To overcome this problem, the field of AutoML targets a progressive automation of machine learning, based on principles from optimization and machine learning itself. This book serves as a point of entry into this quickly-developing field for researchers and advanced students alike, as well as providing a reference for practitioners aiming to use AutoML in their work.

Microbial Products for Health, Environment and Agriculture

Jun 26 2020 This edited volume discusses the role of various microbial products in healthcare, environment and agriculture. Several microbial products are directly involved in solving major health problems, agricultural and environmental issues. In healthcare sector, microbes are used as anti-tumor compounds, antibiotics, anti-parasitic agents, enzyme inhibitors and immunosuppressive agents. Microbial products are also used to degrade xenobiotic compounds and bio-surfactants, for biodegradation process. In agriculture, microbial products are used to enhance nutrient uptake, to promote plant growth, or to control plant diseases. The book presents several such applications of microbes in the ecosystems. The chapters are contributed from across the globe and contain up-to-date information. This book is of interest to teachers, researchers, microbiologists and ecologists. Also the book serves as additional reading material for undergraduate and graduate students of agriculture, forestry, ecology, soil science, and environmental sciences.

Palms of Southern Asia May 18 2022 Southern Asia is a vast and ecologically diverse region that extends from the deserts of Afghanistan to the rainforests of Thailand, and is home to a marvelously rich palm flora. *Palms of Southern Asia* is the only complete field guide to the 43 genera and 352 species of palms and rattans that occur in Afghanistan, Bangladesh, Bhutan, Cambodia, China, India, Japan, Laos, Myanmar, Nepal, Pakistan, Sri Lanka, Taiwan, Thailand, and Vietnam. This attractive guide's handsome illustrations and succinct, authoritative, and jargon-free text make identification easy. Each species account includes the correct scientific and common names, and fully describes morphology, habitat, and uses. Featuring a distribution map for most species and 256 full-color photographs, this is also the only field guide to cover the extremely diverse palm flora of Vietnam, and the first to offer a taxonomic overview of the rattan species of Southern Asia. *Palms of Southern Asia* is a book of major importance for botanists and an invaluable aid for naturalists and conservationists, and it's the perfect field guide for ecotourists traveling in the region. Covers all 352 naturally occurring palms in Southern Asia Features full-color photographs of 256 species, many never before illustrated Includes a distribution map for most species Provides the first taxonomic overview of the rattans of Southern Asia

Vietnam Aug 09 2021 Amidst the revolutionary euphoria of August 1945, most Vietnamese believed that colonialism and war were being left behind in favor of independence and

modernization. The late-September British-French coup de force in Saigon cast a pall over such assumptions. Ho Chi Minh tried to negotiate a mutually advantageous relationship with France, but meanwhile told his lieutenants to plan for a war in which the nascent state might have to survive without allies. In this landmark study, David Marr evokes the uncertainty and contingency as well as coherence and momentum of fast-paced events. Mining recently accessible sources in Aix-en-Provence and Hanoi, Marr explains what became the largest, most intense mobilization of human resources ever seen in Vietnam.

Patriarchy and Accumulation On A World Scale Jul 28 2020

"Maria Mies believes that feminist analysis must transcend the divisions between Western and Third World women. These divisions have been created historically by a capitalist patriarchy that has integrated the whole world into a system of global exploitation and accumulation, at the same time as it has divided people, women in particular. It is from this perspective that Maria Mies explores the state of the

women's movement worldwide; the history of the related processes of colonialism, the witch hunt and housewifization; women's work in the new international division of labour; the issue of increasing violence against women; the relationship between women's liberation and national liberation struggles; and why it is that even in socialist societies patriarchal coercion so often reasserts itself"--from back cover.

Official report Mar 04 2021

Evidence-based Conservation Oct 19 2019 The basis of this book is the disparity between the science of conservation biology and the design and execution of biodiversity conservation projects in the field. The book argues for an 'evidence-based approach', drawing information from fifteen projects in the Lower Mekong regions, with the aim of allowing more effective integrated conservation projects.
