*The Science of Footwear* Aug 29 2020 Although we now have sophisticated algorithms and techniques for determining the shapes and sizes and for matching the fit between shoes and feet, few, if any, of the books currently available cover these new technologies until now. Bringing together high-quality and state-of-the-art contributions from designers, biomechanists, ergonomists, engineers, podiatrists, and scientists from industry and academia, *The Science of Footwear* provides an in-depth understanding of the technology and techniques involved in the design and development of a popular and demanding consumer product. This book introduces the design, development, manufacturing, and marketing of footwear. The chapters contain data from past research and the state-of-the-art methodologies. They not only cover every aspect of the product design, but also how the footwear industry caters to the wide-ranging needs of sophisticated and demanding customers. The footwear industry has rapidly changed over the last 10 years. Mass production has changed to personalization and mass customization, areas that are not well-understood. This book explores these different concepts in a coherent way, drawing on differing views that give a holistic view of the science behind footwear. Collating information from different disciplines, the book provides the tools to develop the next generation of footwear.

**Face Your Shit, Heal Yourself** Jan 22 2020 Face your shit?What even is my shit?Oh, shit!An AR-interactive art book illustrating my journey of healing by looking at the things no one (including you) really wants to see. My name is Meredith Ochoa and I'm another f\*#%ing artist, with a mission. My mission is to show others how to face their pain and see themselves for who they really are. I developed this mission after facing my own debilitating endometriosis pain every month for more than seventeen years. After surgery, crossing over to the other side, and dying from the excruciating pain one too many times, I began to unravel all of the medical lies I had been told, educated myself about how women's hormones actually work, and I healed myself.In April 2021, I started an "Every Phase" series, with this book capturing the first year--six cycles from April through December. The series is focused on how I healed myself with the lesser-known feminine infradian rhythm 28-day clock in contrast to the masculine, 24-hour clock or "everyday" lifestyle. So in response to digital artist Beeple's record-breaking NFT project, Everyday's: The First 5000 Days-in which he created a piece of art every day for five-thousand days-I decided to create a piece of art from start to completion, not every day, but every phase that will continue for the next thirteen years (approximately five-thousand days).Within each 28-day cycle, there are four phases that repeat, which is how the table of contents is organized: Follicular, Ovulatory, Luteal, and Menstrual. The art of each phase illustrates the different brain and body chemistry occurring during each phase.Whether you're experiencing endometriosis or any other painful disorder that has been labeled "chronic" or "incurable," this series exposes the lesser-known resources that can completely change your life: mind, body, and spirit. What I have learned through my experience, and what is continually revealed in my life, is that all healing starts with being authentic (men and women), which is why I encourage others to face their shit.Through my art I am healed, and I heal others.
