**ESSENTIAL MANUAL OF 24-HOUR BLOOD PRESSURE MANAGEMENT** Hypertension is one of the greatest threats to human health. The World Health Organization (WHO) estimates that 1.13 billion people worldwide have hypertension. As such, hypertension is now recognized as a more serious and widespread a condition than ever before. In this new edition of the Essential Manual of 24-Hour Blood Pressure Management, the author emphasizes that lowering the blood pressure (BP) and restoring the BP profile with adequate circadian rhythm is essential for a long life without cardiovascular events. The author also introduces updated evidence for managing hypertension throughout 24-hour periods, from morning to nocturnal hypertension. The Essential Manual of 24-Hour Blood Pressure Management, Second Edition, will be an essential companion for doctors who wish to provide evidence-based medicine and be familiar with the most cutting edge technology on monitoring BP. "An immensely useful manual with many attractive features: comprehensive and lucid keys, precise diagrams, annotated checklists and up-to-date references. ... there is no doubt that it should be seen as an example of the type of manual which is so badly needed in the study of the fauna of many shores around the world."--Journal of Animal Ecology "Congratulations to the editors, contributors, and publisher for a job well done. The third edition has been rewritten, corrected, and enlarged, so that while retaining the basic organization of the earlier ones, it is more useful, informative and up-to-date. The meticulous scholarship of Smith and Carlton is just what the revision needed."--Systematic Zoology "This revision should serve for many

years. It is therefore particularly commendable that the editing has been meticulous, perhaps flawless. ... thanks are due to the many contributors for a job well done."--The Quarterly Review of Biology "As the Pacific Coast intertidal zone undergoes increasingly profound changes, knowing the sentinel invertebrates can foretell the future of the sea, and hence, of our species. Jim Carlton's hefty new update of The Light & Smith Manual, the comprehensive compendium of who's who between the tides, is the best and quickest way to do so."--Elliot A. Norse, President, Marine Conservation Biology Institute "This much-anticipated modernization of "Light's Manual" is an astonishing accomplishment, blending state-of-the-art taxonomy with profusely illustrated and user-friendly keys to who's whom on marine shores from its stated boundaries of mid-California through Oregon, and clearly, much further north. It's also an informative, well referenced read. Marine biologists should not leave home without it."--Robert Paine, Professor Emeritus of Biology, University of Washington "At this time of environmental change and loss of biodiversity, species identification has never been more important. The fourth edition of Light and Smith is more than just a field guide--it is a masterwork of research and description with a strong focus on morphological detail. No other book has such a broad scope, newly expanded to include even the most obscure taxa. The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever. As taxonomists become extinct, there are fewer students to receive the vast body of knowledge accumulated by generations of careful study. I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work. It will have a place of honor in all marine labs."--Paul K. Dayton, Scripps Institution of Oceanography
